

With Open One integration for ATS

Wireless Solution Reduces Time and Increases Accuracy in the Warehouse

MOBILETrak Wireless Warehouse Management Software from ID Solutions is a direct interface with the ATS Open One System. It is designed to emulate the functionality of the inventory transactions users are familiar with on the Open One Software system. Real time, web-service integration means there is no “syncing” or “store and forward” transaction processing . Transactions are processed immediately, AT THE POINT OF ACTIVITY.

Using Wi-Fi and Cellular Technology, MOBILETrak collects and transmits data “Real-Time” back to the MOBILETrak Web Server which links to the Open One System. Inventory Management, Work Order Picking, Receiving, Picking, Put-Away are now collected at point of work providing a Mobile Solution where it is needed.

- Process Physical Inventory, Cycle Counts immediately
- Pick Items for Work-Orders and process transactions in the warehouse
- Decrease errors in data collection
- Generate Purchase Requisitions
- Interfaces with Open One system through Wi-Fi Wireless Web Service Technology.

Multi-Platform Design.

Your choice of Localized Installation or Cloud-based SAAS models running on DESKTOP Browsers, iOS, Android, Windows CE, Windows Mobile Devices providing hardware flexibility.
