

## With iVue integration for NISC

### Wireless Solution Reduces Time and Increases Accuracy in the Warehouse

MOBILETrak Wireless Warehouse Management Software from ID Solutions is a direct interface with the NISC iVUE System. It is designed to emulate the functionality of the inventory transactions users are familiar with on the iVUE Software system. Real time, web-service integration means there is no “syncing” or “store and forward” transaction processing . Transactions are processed immediately, AT THE POINT OF ACTIVITY.

Using Wi-Fi and Cellular Technology, MOBILETrak collects and transmits data “Real-Time” back to the MOBILETrak Web Server which links to the iVUE System. Inventory Management, Work Order Picking, Receiving, Picking, Put-Away are now collected at point of work providing a Mobile Solution where it is needed.

- Process Physical Inventory, Cycle Counts immediately
- Pick Items for Work-Orders and process transactions in the warehouse
- Decrease errors in data collection
- Generate Purchase Requisitions
- Interfaces with iVUE system through Wi-Fi Wireless Web Service Technology.

### Multi-Platform Design.

Your choice of Localized Installation or Cloud-based SAAS models running on DESKTOP Browsers, iOS, Android, Windows CE, Windows Mobile Devices providing hardware flexibility.

### MOBILETrak Wireless Warehouse Management Suite
